DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-7, 14-20 and 28-29, drawn to a portable wireless device that gathers information and updates the display which has icons/commands and provides access to customer service/help functions.
- II. Claims 8-9, drawn to a means of navigating data screens in a mobile device.
- III. Claims 10-13, drawn to a computer readable medium for a mobile device which displays an “active ribbon” which has multiple elements for performing various functions.
- IV. Claims 21-27, drawn to a computer readable medium for a mobile device that performs automatic network access configuration for said mobile phone.

As outlined above, these 4 groupings are mutually exclusive and put forth four independent inventive concepts. The examiner notes that there is nothing in common across these four groups and thus different prior art would be required in order to properly reject these claims -- which presents an additional burden and hence the restriction.

The applicant is requested to elect ONE grouping and cancel all others from prosecution. They may file additional, separate applications to include the other groups.
